8 Kube Showrooms

Our showrooms in Dublin, Cork, Galway and London display stunning sleek and innovative kitchen designs, representing a wide range of colours, materials, and finishes. Our design team at Kube are there to help you create your dream, from design to installation. We'll handle everything for you.

/ See page 6

Design & Installation

A fully trained Kube installer will install your kitchen. The time it takes to install will depend on the size and intricacy of the design, but will typically take between two and four days. A quartz, stone or wooden worktop will need to be templated after the kitchen installation. Following this, the finished worktop will be installed approximately 10 days later.

The Kube Process

In order for us to create your dream kitchen, bedroom or living space, we will need some initial measurements to get us started.

Step 1: Use our kitchen planner to sketch your room and jot down any notes – don't worry, it doesn't have to be perfect at this stage.

Step 2: Visit your nearest Kube showroom and browse our kitchen displays. We have many styles on display, showcasing the design and product quality of a kitchen from Kube. Inspect the many finishes of worktops, door fronts and handles. **Book a design consultation** with a Kube Kitchen Consultant to discuss your brief more fully. Gather all your kitchen ideas, magazine cut-outs and any notes you have made and bring them along to your first consultation.

Step 3: You should allow at least an hour to **meet one of our qualified designers**. All your ideas and notes are discussed and captured in the first design brief. The consultant will need room measurements - either your architect's plans or your own.

Step 4: Our kitchen consultant can now get to work designing your kitchen and preparing a presentation including 3D drawings. This is all completed at absolutely no cost to you. Your initial design will be presented to you at the second design consultation and it is a really exciting stage of the project. You will see your dream kitchen come to life for the first time with our realistic 3D rendering. At this meeting the consultant will walk you through your design brief and present a fully costed option for you to consider. You will get

an opportunity to **delve into the plans and give your feedback**. You can also discuss budgets and agree the requirements to move to the next step of the project.

Step 5: Before placing your order, our installation team will **survey your kitchen space**, taking detailed measurements and photographs, and relay this information to our designers who then create a very detailed order pack with plumbing and electrical plans to aid your builder with their process.

Step 6: Following the survey, **your order is finalised** and our Customer Services department will take charge, keeping you informed of the delivery date. Our Customer Services team are here to help you through this stage. Our handy pre-installation checklist tells you all you need to know in advance.

Step 7: Your kitchen is delivered by our trained in-house delivery team.

Step 8: A Kube trained installer installs your kitchen and typically this will take between two and four days.

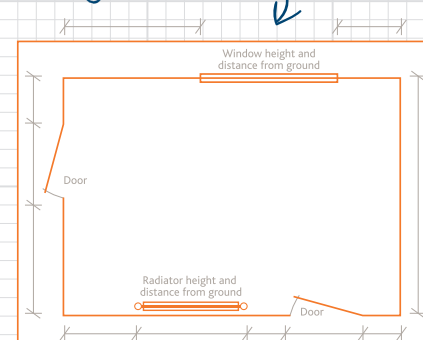

Step 9: A quartz, stone or wooden worktop will need to be templated after the kitchen installation. Following this, the finished worktop will be installed approximately 10 days later. Your plumber and electrician have some second stage fixing to connect your water and electrical appliances. **Your dream Kube kitchen is now ready to be enjoyed.**

CASE STUDIES

Stylish and functional

Our client wanted a modern, functional kitchen that was ideal for both preparing meals and socialising.

The kitchen design incorporated the client's practical needs, complemented by stylistic elements that converted it into a social space. Warm, minimalist colours merge perfectly with the Silestone Lagoon worktop and create a cosy, welcoming feel. The statement island has an attached breakfast bar

in Solid Prada Oak, along with a built-in hob by BORA. A Quooker hot water tap was installed to eliminate the need for a kettle on the worktop. Other appliances include ovens, dishwasher, and coffee machine from Electrolux.

Modern family living

For Jane and Graham, the challenge was trying to establish the most suitable layout for the kitchen so we could fit everything in.

We toyed with a few ideas until we agreed on the most suitable location. A Kansas Oak breakfast bar and matching splash-back behind the hob were added to make this kitchen warm and homely.

Jane and Graham decided on a two-toned option on the kitchen fronts mixing White with Quartz Grey, both in a Lacquered High Gloss finish. Placed over an

80cm induction hob, the white, glass finish extractor blends in nicely with the white, high gloss units. There is a tall, integrated larder fridge and larder freezer side by side flanked by a tall larder storage unit with internal pull out drawers. On the other side is the Siemens studioLine oven featuring a full-size single oven with built-in microwave, pulseSteam, and Home Connect WiFi connectivity.

“From start to finish Kube were impeccable. They understood what we were looking for, what we were thinking and feeling. It’s everything that I wanted. It works for me and my family. That’s why I love the kitchen that we have.”

What our customers think

Simon Delaney put his trust in Kube Kitchens for the ideal kitchen for his family and filming his upcoming cookery show.

Here is an exclusive look at his Kube Lux kitchen in High Gloss Quartz Grey. The worktops are Silestone Quartz in Maple Stellar. A Rustic Wild Oak breakfast bar, with seating for four,

borders the island. In addition to the kitchen design, we planned a simple but very effective, matching, living and TV area by combining the materials used in the kitchen.

"We needed a kitchen that would function well for our family and also look spectacular for filming my upcoming cooking programme. Many of our friends recommended Kube, and we feel fortunate that they did."

“We have been dealing with Pamela Deane in Kube Cork for many years and time and again each project is delivered with professionalism, positivity and craftsmanship. All of my clients’ experience with Pam in Kube has been positive, she is attentive to detail, friendly and delivers each iteration of their wishes on time and exactly how they want it. Danny, the fitter from Kube, is exacting in his installation and catches the unseen details no matter how awkward the room. I will continue to use Kube as my go to kitchen supplier for all of our projects.”

DESIGN PROJECTS

Shomera Partnership

We work in partnership with architects and interior designers to create bespoke solutions for our customers. Here, we get their ideas and views on the entire design project.

As a Design and Build company, at Shomera we place a huge emphasis on the importance of design as well as the quality of the construction work. The success of our bespoke projects under the HousX brand are dependent on well-appointed living spaces.

During the design process we work with our clients to optimise the layout of their extension and its relationship with the existing house and the outdoor areas. As the kitchen is the heart of most people's homes, with life radiating from this area, the kitchen

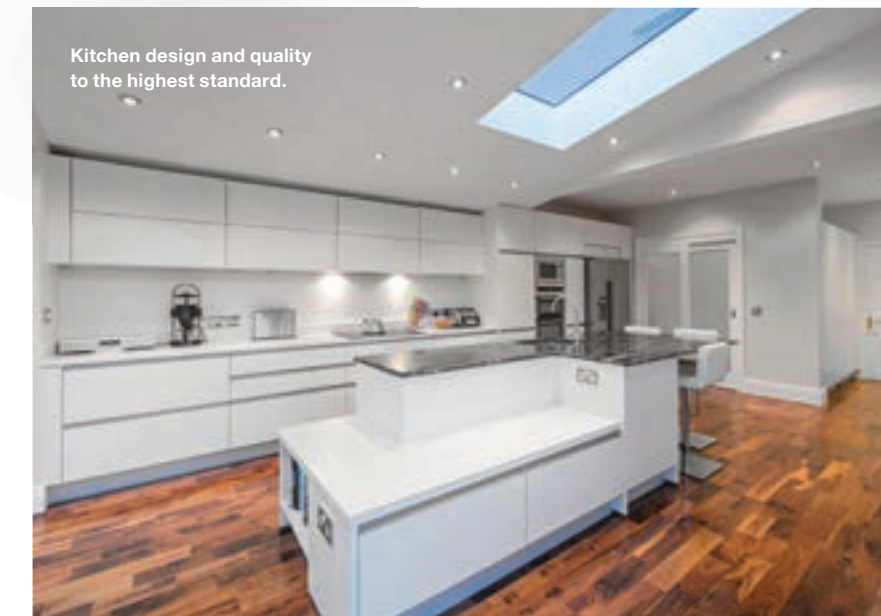

design and quality must be right. This is why we are careful only to recommend a company who we are confident will deliver a great product and service.

"My experience in working with Kube is that the designers have been well trained and are passionate about their work and the design process. I am very happy to hand over the detailed design of the kitchen to Kube, knowing it will complete and enhance the transformation of our clients' homes."

KITCHEN ORGANISATION

Organise your Kube Kitchen

For convenience and functionality, your Kube kitchen designer can create a plan that takes care of all your storage needs. Having everything within arm's length will cut down on the time and hassle of all your kitchen duties.

Your storage plan is the most important part of your kitchen design. The kitchen should look fabulous, but at the same time be functional. Kube have a huge selection of internal storage solutions to suit your needs - from cutlery inserts, corner solutions and clever pull-out storage units to bins that make recycling easy.

Wave goodbye to untidy cupboards and overflowing drawers. Choose from our wide range of drawer storage solutions for storing your cutlery, organising your cleaning products or arranging your storage jars.

A pull-out drawer has many different storage uses with Kube drawer

organisers. Create easier access to those hard-to-reach places, banish dark hiding places and wasted space. From plates to cups and spices to knives, all are catered for in our accessory range at Kube.

Bespoke worktop options

Kube, in partnership with Ireland's premium fabricators, brings you a wide range of natural and synthetic stone options.

Marble, Granite, Natural Stone

Natural stone materials have been used in architectural applications throughout history, thanks to its resiliency and durability. With its naturally crafted designs, natural stone offers a truly unique and timeless elegance for your kitchen.

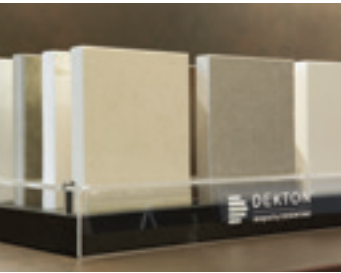

Dekton

Dekton is known to be virtually indestructible. It is great at resisting abrasion, heat, staining and scratching. It is available in more than forty colours across eight collections. As well as being highly durable, it is also practically maintenance free.

Silestone Quartz

Silestone offers distinctiveness with functionality. Both beautiful and resilient, Silestone quartz provides a surface that is a work of art for everyday living.

Ditre Italia Kailua

Combination of leather exterior and soft fabric seats.

Ditre Italia Nevyl

All sofas can be custom-designed to suit your living space.

THE KAILUA

Kailua stems from a concept in which cushions float on a slim surface supported by an invisible, metal mesh. Comfort is a surprise, the right proportions are a certainty. The Kailua sofa transforms elegance into comfort and intimacy. The seat and backrest proportions result in multi-functional elements, perfect to chat or relax on.

The frame is covered with leather or fabric while the cushions feature contrasting or single colours.

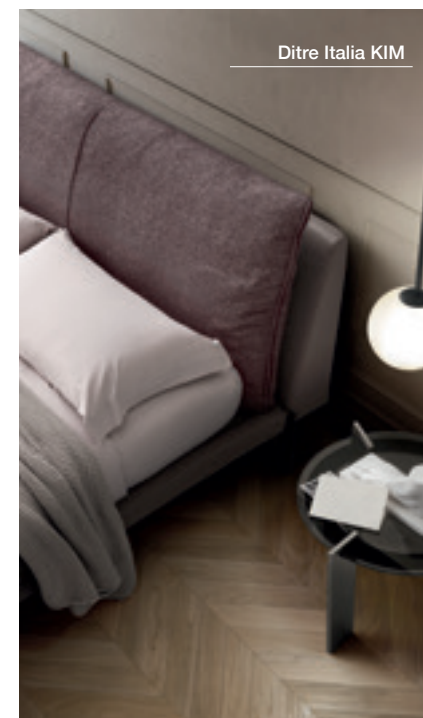

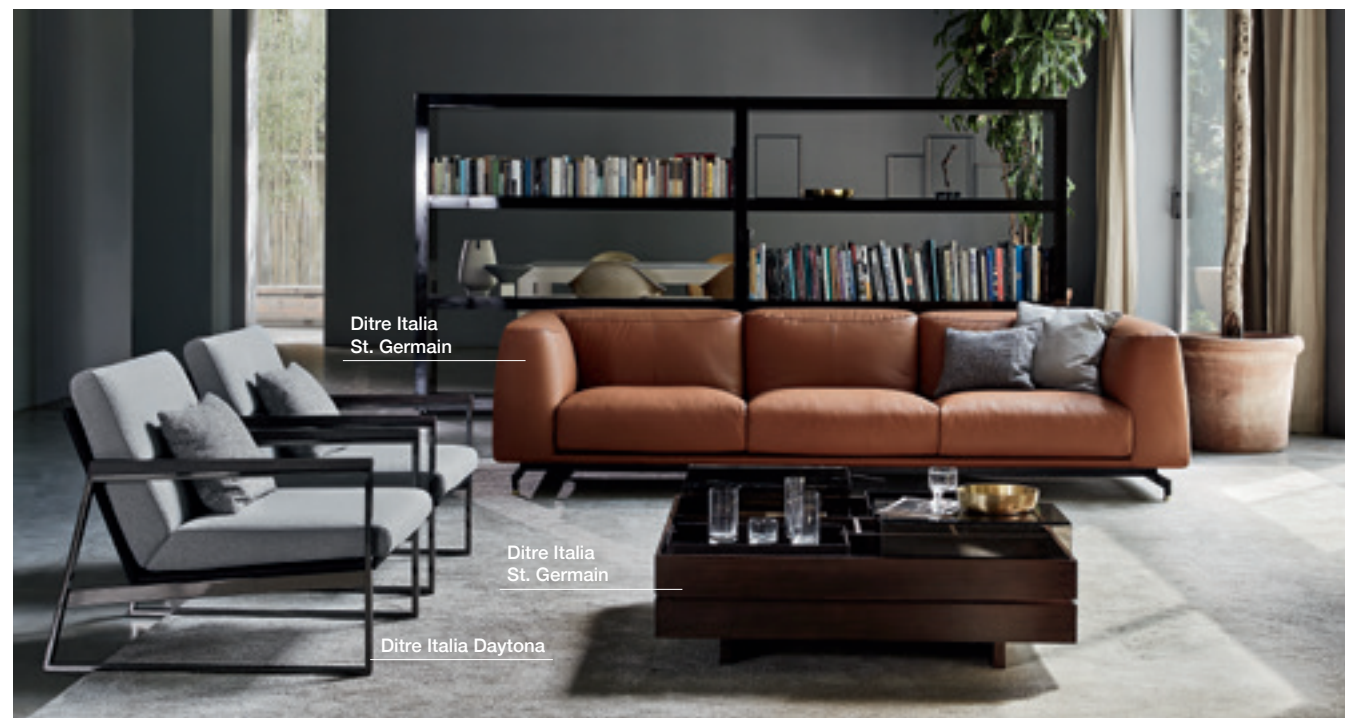

Kailua is a very discreet product, a perfect project from which nothing can be subtracted and nothing can be added.
